

# What to do when cruising through a water ski area

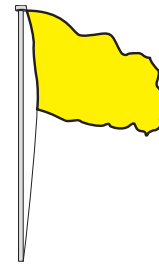

Water skiing takes place on certain reaches of the Rivers Yare and Waveney at certain times as shown below.

The water ski areas are signed on the banks

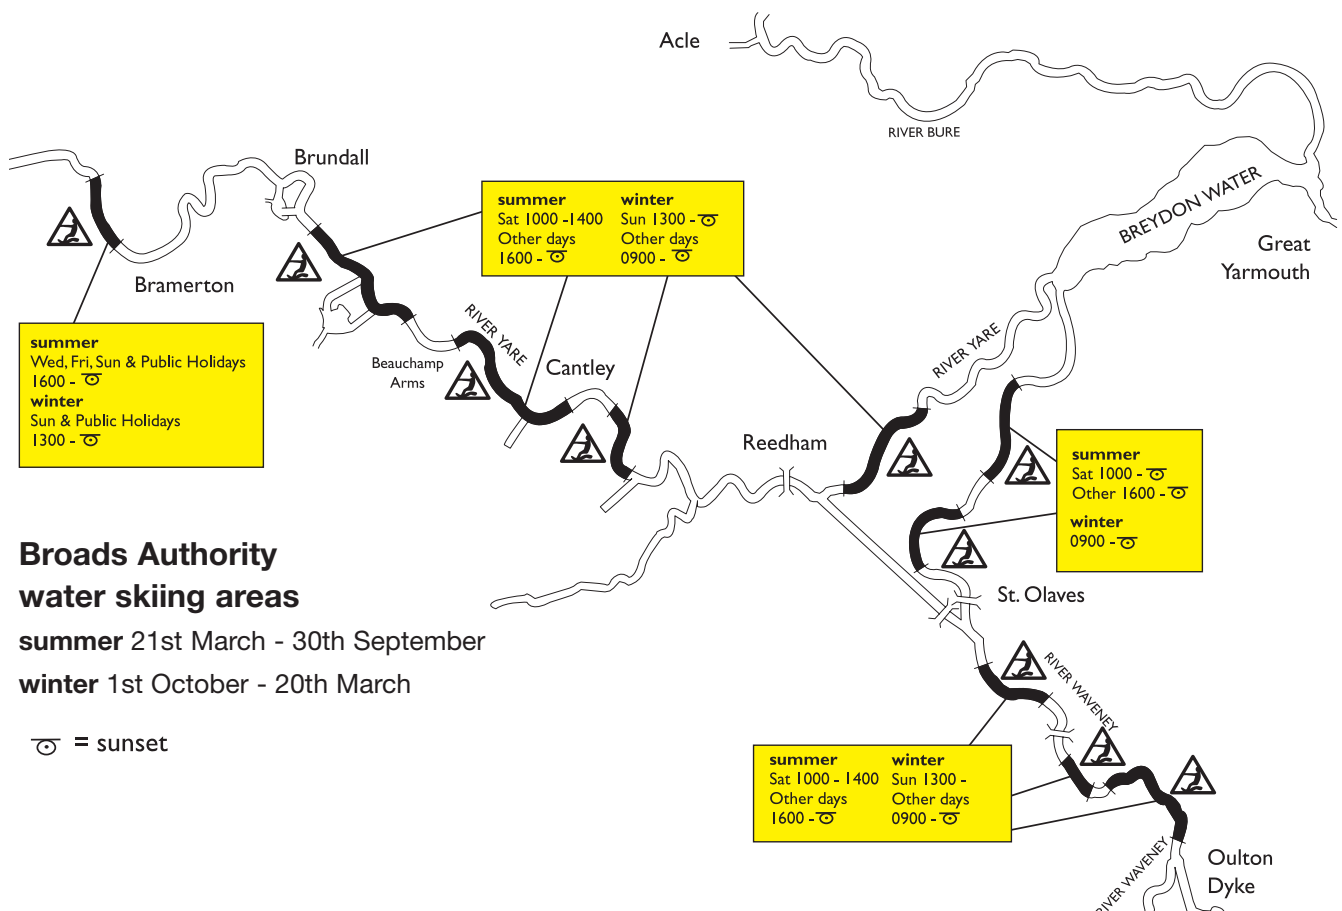

Yellow flag on ski boat:

Extreme caution skier in water

1. Keep to the right hand side of the river whenever possible.
2. Keep a constant course and speed. Stop only to avoid collision or a skier in the water. (The ski boats are faster and more manoeuvrable and will keep out of your way).
3.  On seeing a yellow flag please slow down, give the ski boat a wide berth and keep extra look out for skiers in the water.
4. If you have problems or feel that skiers have behaved irresponsibly, note the boat name or number and report to the Broads Authority River Control, 01603 625091, or a Navigation Ranger.

## Water ski signs

The Broads Authority has completed an interim risk assessment for water skiing and concluded the signage needs to be upgraded. At each water skiing area these signs will mark the start and finish of the area, along with signs explaining the times at which skiing is permitted. Erection of signs will start in April and we aim to complete the work by the end of May 2006.

Be aware of what's happening around you - on the boat, on the water and on the banks. Follow the advice given overleaf.
